Pune, Maharashtra

Summary

XR Systems Engineer with 4+ years of experience designing scalable real-time 3D systems across healthcare and defense domains. Specialized in building distributed XR architectures, digital twin-like streaming systems, and high-fidelity simulation environments.

Strong background in Unity, Unreal Engine, and Python-driven backend systems, with hands-on experience in point cloud processing, real-time data pipelines, and multimodal AI integration.

Github - <https://github.com/jayesh711>

Skills

Unreal Engine, Unity, C++, C#, Blueprints, Python, Networking, AWS, OpenXR, Point Cloud Streaming, RGB-D Synchronization, 3D Reconstruction Pipelines, Multiplayer Systems, LLM Integration, Computer Vision

Experience

XR Developer

Ethosh Design Pvt Ltd • Pune, Maharashtra

04/2025 - Present

- Designed and deployed a **distributed real-time 3D streaming system** for live and recorded point cloud data, enabling multi-user synchronization across XR devices globally
- Architected a **scalable streaming infrastructure** using Cloudflare, supporting high concurrency and low-latency delivery of 3D content
- Built a **digital twin-like medical VR system** integrating BLE-based hardware to stream real-time biometric data into immersive environments
- Developed a **dynamic experience orchestration system** to generate personalized XR simulations based on live health data
- Integrated **on-device LLM capabilities** into an Apple Vision Pro application for secure querying of structured medical datasets
- Designed and implemented **multimodal AI interaction systems** (Speech-to-Text and Text-to-Speech) for hands-free clinical workflows
- Created a **custom data pipeline for RGB + depth synchronization** using camera intrinsic parameters for accurate 3D reconstruction
- Developed reusable Unity plugins for **data persistence and telemetry pipelines** integrated with AWS S3

Associate XR Developer

Ethosh Design Pvt Ltd • Pune, Maharashtra

08/2022 - 03/2024

- Engineered a **high-fidelity firearm simulation system** for defense training, validated with real-world ballistic behavior and military feedback
- Built a **multiplayer simulation environment in Unreal Engine** for collaborative surgical training use cases
- Delivered a **cross-platform XR application** (iOS, Android, Windows) for medical product visualization and training
- Designed immersive **simulation-based compliance training systems**, replacing traditional learning with interactive XR workflows

- Optimized XR rendering pipelines across Meta Quest and mobile devices to maintain consistent performance in complex scenes

Intern XR Developer

Ethosh Design Pvt Ltd • Pune, Maharashtra

02/2022 - 07/2022

- Developed Unreal Engine applications using **Pixel Streaming**, enabling remote access to high-fidelity 3D environments
- Integrated **MetaHuman-based interactive agents** to enhance user engagement in simulation environments
- Built modular reusable components to improve team productivity and reduce development cycles
- Profiled and debugged XR applications for performance stability across devices

KEY PROJECTS

Education

Masters in Computer Applications

Fergusson College • Pune, Maharashtra

06/2022

Bachelor's Degree in Computer Science

Fergusson College • Pune, Maharashtra

06/2020
